

STUBBLE CRUNCHER

# MANDAKO

SOLID DESIGN...PROVEN PERFORMANCE

The **STUBBLE CRUNCHER** is an *easy* and *effective* choice in a variety of conditions. Whether it's chopping up corn stalks, breaking down canola stubble, or gently incorporating cover crop, the **STUBBLE CRUNCHER** gets the job *done!*

## BENEFITS

Leftover residue from harvest can take a long time to decompose. This causes issues when planting or seeding in the spring. Using the Stubble Cruncher helps speed up the decomposition process by "crunching" the residue in to the ground.

## FEATURES

- 24" Diameter Drum
