

EURO TWISTER

MANDAKO

SOLID DESIGN...PROVEN PERFORMANCE

THE MANDAKO EURO TWISTER

The Mandako Twister is the true Vertical Tillage machine, outperforming the competition in heavy soils and clay applications.

It features a simple design and a hydraulic hitch to effortlessly move between field and transport mode. Easy to use in the field with working widths up to 20' and easy to transport on the road with a less than 8' width.

Benefits

Use your Mandako Twister for the lightest pre-tillage applications in the spring and heavy residue management in fall... and everything in between

HEAVY DUTY CONSTRUCTION

The heaviest Vertical Tillage machine on the market.

AGGRESSIVE TILLAGE

-Unique ability to angle the discs up to a 7 degree angle.

INDEPENDENT DISC SUSPENSION

The Twister Vertical Tillage machine can penetrate any soil conditions and stay in the ground.

- Superior spring-down pressure on each disc
- Independent disc system (vs the "ganged" system which risks damage to the unit and inconsistent tillage)

AVOIDS DEBRIS PLUGGING

In wet conditions, our machine is renowned for not "plugging" with debris and in the fall allowing the operator to effectively deal with wheat stubble and BT Corn stalks.

Features

+ Standard widths of 12' , 16' and 20'

+ Hydraulic depth control

+ Heavy wall frame tubing

+ Independent coulters suspension

+ Patented triple lip seal on coulters hubs

+ Hydraulic angle adjustments

+ 700+ penetrating lbs/ft

ACCESSORIES/OPTIONAL:

- + Round/Flat bar rolling baskets
- + 2 row/3 row spring tine harrows
- + phillips rotary harrows
- + 12.5L floatation tires
