AVAILABLE SIZES:

SINGLE:
12' | 16'

3-SECTION:
24' | 28' | 32' | 36' | 40'

FEATURES

- Hydraulic Angle Adjustment: 0 - 7 Degree
- HD Tine Harrow
- Hydraulic Rolling Baskets (flat or round bar)
- 12" Blade Spacing (6" cut)
- Independent Coulter Suspension
- Triple Lip with Ductile Coulter Hub Seal
- Quick Change Coulter Hub (one bolt)
- Heavy Wall Frame Tubing (6" x 6" x 1/2")
- 700+ Penetrating lbs/ft
- Hydraulic Depth Control
- 3-Way Electronic Selector Valve
- Only Grade 50 Materials Used

OPTIONAL ACCESSORIES

- 2/3/5 Row HD Tine Harrow
- Flat or Round Rod Rolling Baskets
- Clevis Hitch Insert

BENEFITS

Use your Mandako Twister for the lightest pre-tillage applications in the spring, for heavy residue management in fall... and everything in between! It's the **heaviest** Vertical Tillage machine on the market! With its unique ability to angle the discs from 0 up to a 7 degree angle, the Twister provides True Vertical Tillage. It can penetrate in any soil condition and **stay** in the ground. It is also equipped with superior spring-down pressure on each disc and has Independent disc system (vs the "ganged" system which risks damage to the unit and inconsistent tillage). In wet conditions, our machine is known for not "plugging" with debris, and in the fall allowing the operator to effectively deal with wheat stubble and BT Corn stalks.
